## PROFESSIONAL SUMMARY

Architecting and deploying intelligent, production ready web applications. Specialized in integrating LLMs and Computer Vision to automate complex business workflows and building scalable AI-driven systems. Focused on leveraging high velocity AI-native development workflows to deliver high impact solutions at scale.

## WORK EXPERIENCE

### Freelance Full Stack Developer

May 2025 - June 2026

- Deliver high performance web solutions for clients by utilizing AI-augmented engineering workflows, significantly **increasing development velocity and project turnaround time**.
- Implement intelligent features into web platforms, including **automated data processing** and **AI-driven user interfaces**.
- Manage **end-to-end deployment** and infrastructure including **domain configuration** and **server management** to ensure
- **99.9% uptime** for client production environments.

## KEY CLIENT PROJECTS

### Esports Tournament Platform & AI-Powered Scoring Engine

- Designed and developed a **Full Stack Esports Tournament Platform** for managing online gaming systems.
- Created an **AI Magic Point Scanner** utilizing Google Gemini **Vision API** to automate tournament result processing from screenshots, achieving a **90% reduction in manual data entry time**.
- **Engineered advanced prompts** to extract structured JSON data, including player names, kills and rankings from complex gaming imagery.
- Implemented a **Human-in-the-Loop** UI for admins to verify **AI-detected data in real-time**.
- **Live:** [eaglesport.com](#)

### University Conference Website (Civil Department, CUTM)

- Designed and developed an official **university conference website** for a Civil Engineering department event.
- **Ensured secure deployment** with HTTPS, optimized domain configuration and enhanced performance for live users.
- **Live site:** [suchid.cutm.ac.in](#)

### Business Landing Website (Digital Marketing Client Project)

- Developed a **high converting landing page** for a digital marketing client to showcase services and generate leads.
- Worked directly with the client to align the design with **branding and marketing goals**.
- **Live:** [onexpass.pages.dev](#)

## SKILLS

|                                 |                                                                                                                                 |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <b>AI / LLM Integration :</b>   | OpenAI API, Google Gemini Vision API, LLM Integration, Prompt Engineering, Computer Vision, AI Workflow Automation, RAG (Basic) |
| <b>Programming Languages :</b>  | Python, JavaScript                                                                                                              |
| <b>Full-Stack Development :</b> | Node.js, HTML5, CSS3, REST APIs, Git, GitHub, ReactJS                                                                           |
| <b>Databases :</b>              | MySQL, Firebase, Supabase                                                                                                       |
| <b>AI-Augmented Dev Tools :</b> | Cursor, Claude Code, OpenAI Codex, Antigravity, Windsurf                                                                        |

## EDUCATION

### Centurion University of Technology and Management

*Bachelor of Technology in Computer Science & Engineering*

2022 – 2026 (Expected, June 2026)

*CGPA : 8.8*

### Saraswati Science Higher Secondary school

*Class 12<sup>th</sup>*

2019 - 2021

*Percentage : 80.1%*

## ADDITIONAL SKILLS

- Video editing for a business-focused YouTube channel — storytelling, cutting, transitions and effects.
